Designed and custom built in Denmark

NORDSHIP 360DS

Trough more than 30 years the design of Nordship has evolved with important input from the owners.

With the new Nordship 360DS Lars Buchwald has continued the successful line of the Nordship 43DS, Nordship 40DS and the Nordship 380DS and have extended the range of Yachts with their unique raised deck saloon with 360˚panoramic view, offering both excellent sailing performance and a high level of comfort.

The interior is bright and open, the yachts are easily handled under sail as well as under engine. The cockpit is designed so that the helmsman has full control of the boat at his fingertips and can operate all functions from the helm.

Truly an investment to cherish and be proud of at sea as well as in any harbour.

Owner - Lars Buchwald
