Designed and custom built in Denmark

Nordship 380 DS

For more than 35 Years the design has evolved with important input from Nordship owners.

The Nordship 380 DS is no exception, and it fits perfectly into the successful line of Nordship deck saloon yachts from 36 to 43 feet.

The modern hull with its torpedo keel, modern rigging with a self-tacking jib and all lines lead back to the cockpit, makes this yacht easy to handle under sail as well as under engine, either single handed or with a very small crew.

The interior is bright and open with the unique raised deck saloon offering a 360° panoramic view through the large windows. The interior is customized on every yacht, according to the owner's needs and wishes.

Truly an investment to cherish and be proud of, at sea as well as in any harbour.

Owner - Lars Buchwald

Two-fingered control

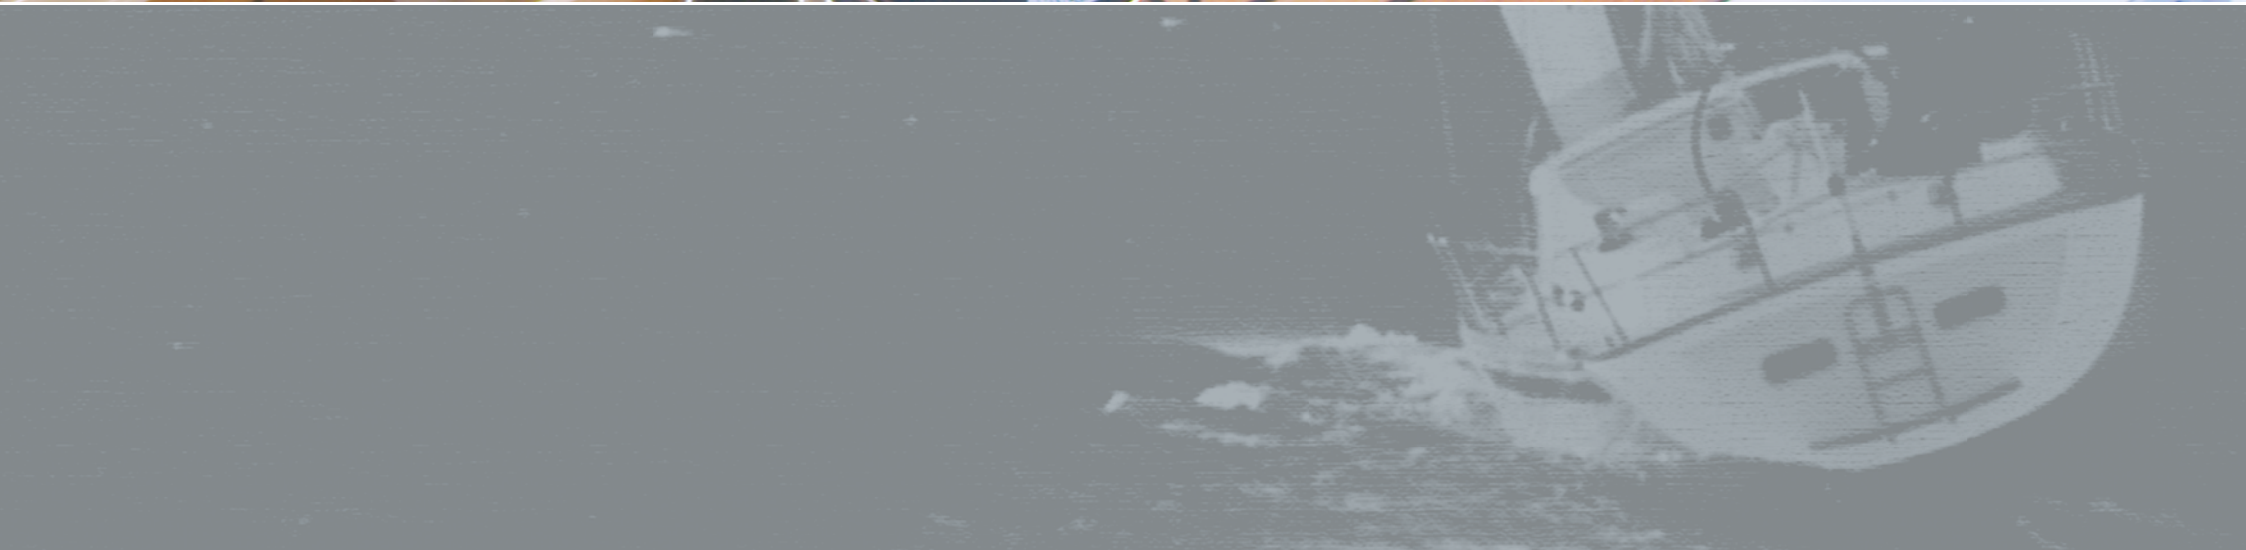

As there are no standard sailors...

We do not build standard yachts
